ROSHNI JAISWAL- *Software Developer Engineer*

Bhopal, MP , India ● roshnijaiswal82240@gmail.com ● (+91) 8224070489

Portfolio **GitHub** **LinkedIn**

SUMMARY

Detail-oriented Full Stack Developer with hands-on experience at Netlink, building scalable web applications and interactive business intelligence dashboards. Skilled in MERN stack, authentication systems, real-time data handling, and KPI-driven analytics using Lumenore. Proven ability to deliver secure, user-focused solutions while leveraging AI tools and modern technologies for performance optimization and impactful results.

EDUCATION

MCA Master of Computer Application (9 SGPA) May 2025
Sagar Institute Of Research And Technology

BSC (CS) Bachelor of Science in Computer Science June 2023
Barkatullah University, Bhopal

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), HTML5, CSS3
Frameworks/Libraries: React.js, Node.js, Express.js, Three.js, Framer Motion, Tailwind CSS
Database: MongoDB
Tools & Platforms: Git, GitHub, Vite, Postman, WordPress
Analytics & BI: Lumenore (Data dashboards, charts, insights)
AI Tools: VS Code, Antigravity, Cursor, Notion AI, Gamma AI
Technologies: Vercel, Render

WORK EXPERIENCE

Netlink Software Group America ltd. **Dec 2025 - Present**

- Developed Event Planner, a web-based task management application with secure authentication, structured task tracking, deadlines, priority levels, and dark/light mode support.
- Built Travel Watch, a location-based entertainment discovery platform featuring real-time content filtering, search functionality, and an admin dashboard for managing hotels and channels.
- Designed and developed interactive Employee, Customer, and COVID dashboards using the Lumenore analytics platform for KPI tracking, data modeling, and business insights.
- Contributed to the development of the Saira Foundation NGO website, focusing on structured design, user experience, and responsive web implementation.

PROJECT EXPERIENCE

Netlink Event Planner System - *Link*
Tech: React.js, Node.js, Express.js, MongoDB
- Developed full-stack event planning platform with booking and management features
- Implemented authentication, REST APIs, and dynamic data handling

TRAVEL WATCH - *Link*
Tech: React.js, Node.js, Express.js, MongoDB
- Developed Travel Watch, a location-based entertainment discovery platform enabling hotel guests to access live TV, local channels, and streaming content with real-time schedules and smart search/filter features.
- Built an Admin Dashboard to manage hotels and channel data, improving content accessibility and overall in-room entertainment experience.

Saira Foundations NGO Website - *Link*
Tech: Wordpress
- Developed and deployed NGO website with optimized performance and SEO structure
- Customized themes and plugins to meet client requirements

TheBookGallery - *Link*
Tech: MERN Stack
- Built full-stack book management platform with user authentication
- Implemented CRUD functionality and scalable backend APIs

Dashboard Suite Overview (Built in Lumenore)
I developed three interactive dashboards in Lumenore: Employee, Customer, and COVID Dashboards, designed for real-time analytics, KPI tracking, and data-driven decision-making.
1. Employee Dashboard
Provides insights into workforce performance and HR metrics such as total employees, active vs inactive status, department distribution, attendance trends, performance analysis, and attrition. It supports better HR and productivity decisions.
2. Customer Dashboard
Focuses on business and customer insights, including total customers, new vs returning customers, revenue trends, segmentation, and geographic distribution. It helps improve marketing strategies and revenue growth.
3. COVID Dashboard
Visualizes COVID data like total cases, recoveries, deaths, active cases, and region-wise trends. It enables effective monitoring and analytical decision-making.
